

# API Creation and Management Training

*Get a head start on your integration success with API Creation and Management training*

## API Creation and Management Training

This course is designed to teach you how to create, run, and secure APIs within the Jitterbit iPaaS platform. It is a combination of lecture and demonstration, along with hands-on assignments. As this course is focused on API creation and management, previous experience with the Jitterbit iPaaS platform is essential. If you do not have previous experience with Jitterbit, delay this course and complete the Jitterbit Foundations and Jitterbit Core training courses first.

### KEY BENEFITS

- ✓ On-demand, self-paced training allows you to learn when and where you want.
- ✓ Learn about the ways you can create, run, and secure APIs within the Jitterbit iPaaS platform.
- ✓ Understand best practices for managing your APIs.

## Syllabus
